

## Install Instructions jbgtoppm on OS X

1. Select in the Finder Go/Go to Folder...
2. Enter as path `/usr/local/bin` and click onto Go

3. Copy the file `jbgtopbm` into the folder. Maybe you have to enter your administrator name and password to proceed the copy operation.

Thats all. The tool is now installed and can be used by all apps on OS X.

You can call it from the terminal the following way:

```
/usr/local/bin/jbgtoppm /pathToSource/file.jpg /pathToDest/file.ppm
```

You can download the source code of the tool directly at:
